

2. témakör: Pneumatikus vezérlések

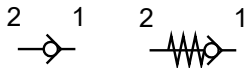

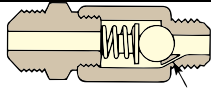

Nyomáscsökkentő szelep

Nyomáscsökkentő szelep		
------------------------	---	---

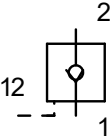

Biztonsági nyomáshatároló szelep

Biztonsági nyomáshatároló szelep		
----------------------------------	---	--

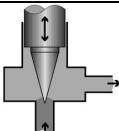

Egyenirányító szelep

Visszacsapó szelep egyszerű és rugós		
--------------------------------------	---	--

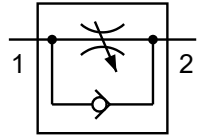

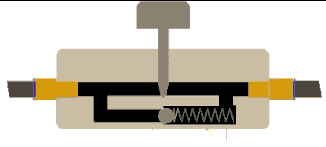

Biztonsági (zuhanásgátló) szelep

Vezérelt visszacsapó szelep		
-----------------------------	---	--

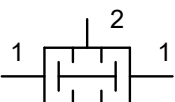

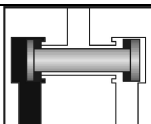

Kétirányú sebességszabályzó szelep

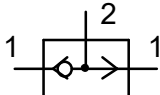

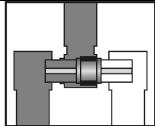

Fojtó szelep		
--------------	---	---

Egyirányú sebességszabályzó szelep

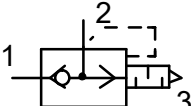

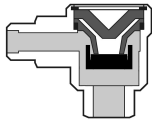

Fojtó-visszacsapó szelep		
--------------------------	---	---

Logikai szelepek

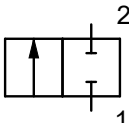

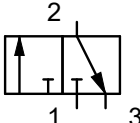

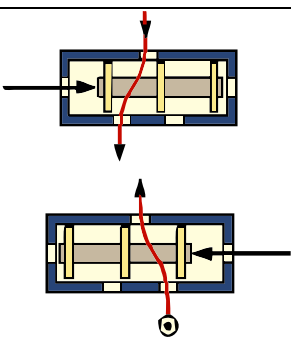

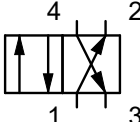

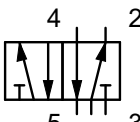

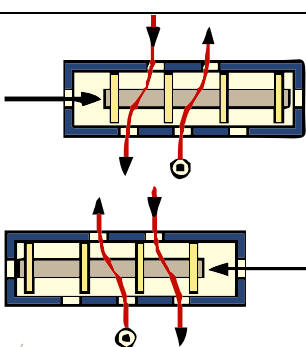

„ÉS” szelep		
-------------	---	---

„VAGY” szelep		
---------------	---	---

Gyorsleürítő szelep

Gyorsleürítő szelep		
---------------------	---	---

Útváltó szelepek

2/2-es szelep		
3/2-es szelep		
4/2-es szelep		
5/2-es szelep		

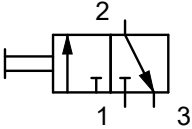

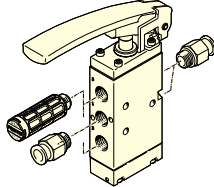

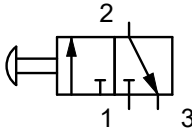

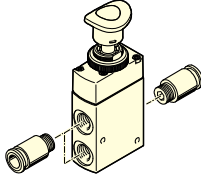

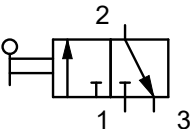

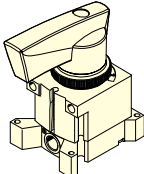

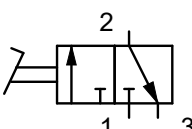

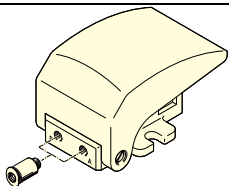

Útváltó szelepek kiegészítói

Monostabil (rugó-visszatérítéses) (Spring-returned)		
---	---	--

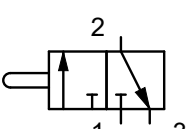

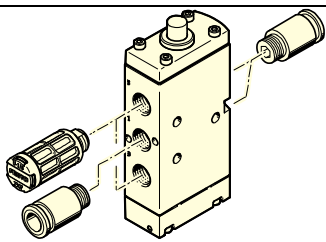

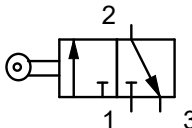

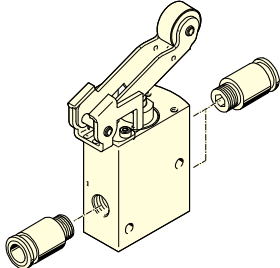

Elővezérelt (szervó) (Piloted)		
-----------------------------------	---	--

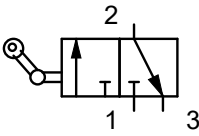

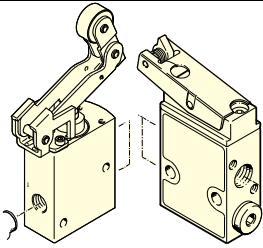

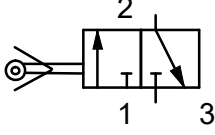

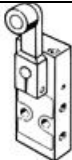

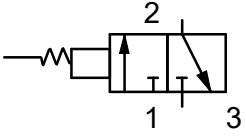

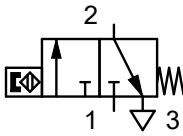

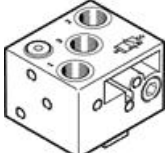

Útváltó szelepek működtetői

Emberi beavatkozással működtetett (Manually) (3/2-es példán)

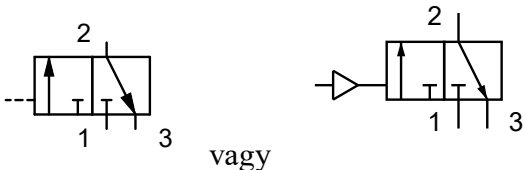

Általános kézi működtetés		
Nyomógombos		
Kézikaros		
Lábpedálós		

Mechanikus működtetés (Mechanically) (3/2-es példán)

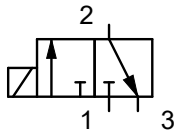

Csapos		
Görgős		

Egyirányban kapcsoló görgős vagy ékes		
Elforduló görgős		
Pálcás (csavarrugóban végződő acélpálca érzékel)		
Mágnes-közelítéskapcsolós (kengyellel a munkahenger külső falára rögzíthető)		

Pneumatikus működtetés

Pneumatikus működtetés	
------------------------	--

Elektromos működtetés

Elektromos működtetés	
-----------------------	--
